

5 reasons

why you should work with Precision Agriculture

1. No Lock in Contracts

We don't make you to lock in multi year contracts as we know you want the flexibility. Things change and you may want to change with it

2. It's Your Data

Your data is exactly that – Yours. We don't sell it or lock it up. We use it to generate your custom maps and keep it safe.

3. Backed by science for Australian conditions

Our classic science backed solutions are developed in Australia for Australian conditions. We only recommend solutions that are “ground truthed” for the local conditions. We also work with recognised research institutions to ensure our products can help solve your issues.

4. Local support always on call

We are Australian owned and operated with local support on call. We are here to take your call you when you need assistance during the busy harvest and spreading period.

5. Experience

Precision Agriculture has been operating across Australia for 10 years delivering curated solutions to its customers
